```java
@Override
public void onEvent(RequestEvent event) {

    final RequestEvent.Type eventType = event.getType();
    if (eventType == RequestEvent.Type.RESOURCE_METHOD_START) {

        // START BUGFIX
        Method method = event.getUriInfo().getMatchedResourceMethod()
        .getInvocable().getDefinitionMethod();

        UnitOfWork unitOfWork;
        if (methodMap.containsKey(method)) {
            unitOfWork = methodMap.get(method);
        } else {
            unitOfWork = method.getAnnotation(UnitOfWork.class);
            if (unitOfWork != null) {
                methodMap.put(method, unitOfWork);
            }
        }
        // END BUGFIX
        ...
    }
}
```
